Use instructions

Dosage –

Dosage are totally depending on the types of drain and blockage intensity of the drain.

Normal drains –

200 ml product sufficient to clean the normal drains.

Leave 30 minutes after pouring the liquid directly into the drain. Flush the drain with water. If possible, use hot water.

Heavily blocked drains –

500 ml product sufficient to clean the heavily blocked drains.

Leave for more time. If possible, best results after leaving it overnight. Flush away with hot water.

For maintenance of drains, it is recommended to use the 175 ml liquid every 15 days after first and complete removal blockage wherever chances of blockages is high.

For normal drains, where blockage happening less frequently or once in 3 months, recommended to use 200 ml product once in a month to remove the deposits which will cause blockage at later stage.
